

**SPI-Wizard hardware , software and communication modules price list :**

**SPI-Wizard hardware :**

USB to OBD interface supporting Dual K line , CAN 2.0 and pin switching on the OBD II plug for compatibility with special OE Flashing requirements.

Hardware is supplied with a Semi-Master or Slave user interface software.

Price : 500 EURO

**SPI-Wizard Master software features :**

These features allow the Master to encrypt files based on rolling code technique or on credit basis. Files will be locked to the Slave device under this Master.

Files encrypted with the rolling code technique will be valid for one flash only. After flashing the file a new code will be generated inside the device .

Files encrypted based on credits can be used until the Slave device runs out of credits.

Additional features are enabled in this version including e-mail generator for requesting files from the Master, Return to standard code generator, credit generator and more.

Price : 300 EURO.

**SPI-Wizard communication modules :**

All supported Ecu's and vehicle types are for reference only !!! More supported vehicles may not be in the list but still supported.

Once the module has been selected for use, the system will identify the correct vehicle automatically (even if it is not listed).
